

MicroLatch™

Microlatch FOB-2B

Features:

The FOB-2B2W Wireless keyfob offers simple and low-cost expansion for any existing access control systems incorporating industry standard Wiegand™ protocol.

This solution offers immediate integration with no-customer down-time. Additionally, a system can be installed at affiliated offices or at home, utilising the same keyfobs for operation of a range of controllers, door alarm panel, PC login garage and gate entry systems, instead of expensive upgrades or diverse systems requiring the carriage of several keyfobs or access cards.

Technical specifications:

Operating Voltage	:	12VDC
Battery Type	:	12V 27A x 1
Current consumption	:	Max. 42 mA (Transmitting)
Operating frequency	:	433.92 MHz
Transmission Security	:	Keeloq™ Code Hopping Technology
Modulation	:	AM/ASK
RF Range	:	Typical 100m (environment dependant)
Wiegand Encoding	:	26 bit Wiegand data encrypted within Keylog Rolling Code
Operating temperature	:	-10°C ~ +40°C
Dimensions	:	50 x 30 x 12 mm
Safety & Certifications	:	C-Tick, CE and FCC
